## Calgary Association of Technical Societies

### **NACE CALGARY SECTION**

The goal of NACE Calgary is to protect people, assets and the environment in Western Canada from the affects of corrosion. We do this primarily through seminars, training and networking opportunities for people who are involved in corrosion prevention and control.

NACE Calgary has more than 700 members in southern Alberta. We are one of the Northern Area sections of NACE International, a professional technical association dedicated to promoting public safety, protecting the environment, and reducing the economic impact of corrosion. With more than 18,000 members worldwide, NACE International is the largest organization in the world committed to the study of corrosion.
